

TESTING EVIDENCE

Browser Testing

Browser	Result
Google Chrome	Passed
Microsoft Edge	Passed

Viewport Testing

Viewport	Result
Desktop View	Passed
Mobile View (375 px)	Passed

Developer Tools Inspection

Inspection	Result
CSS Box Model	Verified
Computed Styles	Verified
Responsive Layout	Verified

Layout Issues and Corrections

Issue	Correction
Event cards were too close on mobile devices.	Added a media query to display one card per row.
Navigation links were crowded on mobile screens.	Changed the navigation to a vertical Flexbox layout.

Final Result

The webpage was successfully tested in two browsers and on both desktop and mobile viewports. All sections, navigation links, event cards, registration form and responsive features worked correctly without layout issues after applying the necessary corrections.
